Desktop grommet covers easily open and close to allow access into the desk legs and wireways.

Power and data modules are easily relocatable and configurable for multiple user needs.

Partial modesty panel option shown on the left and full modesty panel option shown on the right, give the user a choice depending on where the desk is placed.

Power is available under the worksurface of Volition where it is easily accessible.

Optional cable troughs with full covers are available for situations that warrant it.

Power from other OEI systems products can be integrated easily to power Volition workstations and vice versa.
