

Flexible-Screen System

## The Beauty of Flexibility

**Fanfare** flexible office product brings a more fluid approach and graceful appearance to the changing requirements of the workplace. Be more mobile. Be more interactive. Reconfiguration is simple and easy compared with other traditional systems furniture.

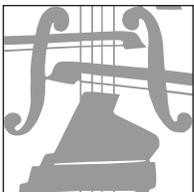

**Fanfare** effortlessly adapts to the task at hand, then back again... Creating linear or curvilinear configurations with equal ease... Compressing space... And expanding it.

**Fanfare** works for today's upsize/downsize work world. Because it can change again and again. And because it's faster and simpler, it's more cost-effective than traditional reconfiguring. Transforming offices from private stations for task-intensive projects, to open spaces for team interaction, becomes a breeze!

**Fanfare.** Unlimited flexibility—with a remarkable sense of style.

- 1 The UL-listed PowerTower forms the integral hub of the **Fanfare** workspace. The floor-to-ceiling tower encloses power, voice and data cabling, allowing panels to be virtually wire-free.

② Flexible and fixed panels create effective visual and sound barriers.

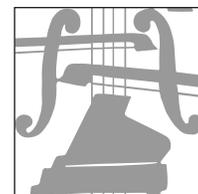

③ Freestanding fixed or height-adjustable worksurfaces adapt to user and task requirements.

④ *Mobile files and open or closed overhead units provide storage options.*

⑤ *Tool rails, paper management and desk accessories put office essentials at the fingertips.*

## FANFARE

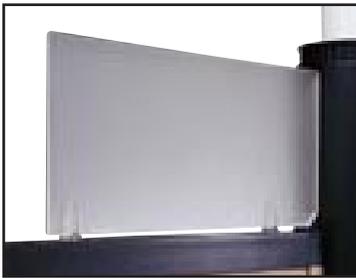

*A quad box routes three 20-amp power circuits, voice, and data cabling to each workstation.*

*Telescoping Power Towers attach directly to ceiling grids and adjust to heights of 8 to 10 feet. Because panels are wire-free, mobility and ease of reconfiguration are greatly enhanced.*

*PowerTowers may be attached off-grid for unrestricted use of space. A Modular Zone Electrical Box (MZE) provides plug-and-play connections and zoned electrical coverage, making moving, reconfiguration and reconnection effortless.*

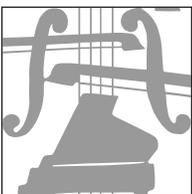

*Custom details such as plexi-toppers in rectangular, wave or curved shapes enhance privacy.*

*Articulating panel connectors allow panels to fold outward 360 degrees to open an area for interaction, then close it for instant privacy.*

*Unlike traditional modular systems, panels can be connected at any point with off-module mounts, creating unlimited layout possibilities.*

## FANFARE

Versatile tool rails allow the user to position paper management and organizational accessories above the worksurface to control clutter.

Worksurfaces are easily raised or lowered with the turn of a crank to height preferences from 23" to 34". Space-saving tripod bases on corner units create maximum legroom.

A high-pressure laminate with a rugged 3mm edge provides the most durable surface available for workstations. The pressed-membrane worksurface features gently contoured edges and seamless, shaped profiles that are easy on wrists and elbows.

Mobile pedestal files with box drawers and pencil trays trundle under work-surfaces to maximize space and storage. An optional fabric cushion creates pullout seating on demand.

Combine additional filing and work areas with mobile 2-drawer lateral files. Files accept optional tops to extend worksurfaces.

Optional 44"-wide storage unit attaches with a load bar. Overhead storage components are available open, or closed with retractable doors.

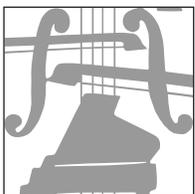

Additional plug-in capacity can be easily added at worksurface height with an optional clamp-on power box.

Display space can be enhanced with tackboards, which hang from overheads or are supported by the worksurface.

Paper and office essentials are organized with stylish tool rails and attaching accessories.
