Mattresses, Towels and Linens

Bedding Products

Recognizing that needs differ among customers, FPI has developed a line of products to fit any bedding requirement.

Our top-of-the-line Royal Court and Nightingale series bring a superior level of comfort to guest and living quarters, while our Quarters series is ideal for dormitories and barracks. Our BodyCare and Bunk mattresses serve institutional needs

Manufacturing

Building Value from the Ground Up

We take extra care to produce bedding that provides superior value for a reasonable price.

Our box springs are constructed with high-loft padding for comfort and durability and reinforced for greater strength and support. In the same way, our mattresses, in firm and extra-firm models, are layered with first rate materials and ticking, then padded to guarantee luxurious comfort and a good night's sleep.

Materials

Getting Out What You Put In

Only the finest materials are incorporated into our bedding. Mattress pads are allergy- and odor-free and mildew resistant. Resilient high-loft padding, high-tech polyurethane foam and quality ticking complement a superior design and ensure our mattresses and box springs will provide restful, posture-correct sleep for a long, long time.

Glossary of Terms

- Anti-Bacterial**-Factory Applied treatment that enables anti-bacterial agents to be activated by wiping the treated surface with a damp cloth.
- Anti-Static**-Factory-applied treatment that enable the treated fabrics to resist static.
- Batting Barrier**—Cover for the cotton felt filling used in FPI's Bunk Mattress.
- Bonnell-Type Spring**-Spring designed in the shape of an hourglass and knotted at both ends for strength.
- Border**-Perimeter of the mattress.
- Border Rod/Wire**-Strong wire running the perimeter of the mattress providing strength, durability and support to the mattress shape.
- Continuous Wire Innerspring**-Unique spring design that provides strength and durability to the innerspring.
- Corner Guards**-Protective plastic edge applied to the mattress corners to reduce wear.
- Cotton Linters**-Lesser quality cotton used for filler.
- Fiber Resin**-Fiber bonding agent used in FPI's insulator parts.
- Gauge**-Measure of wire/spring thickness; a lower gauge denotes a thicker, stronger wire.

Product Testing

Where Quality Begins

To ensure a high standard of quality, we subject our bedding products to the same rigorous testing applied to the finest commercial bedding. Our coil wires exceed industry standards and all mattresses and box springs meet or exceed the flammability standards in DOC-FF-4-72. All bedding components are visually checked for quality construction. Finished mattresses, box springs, and in particular ticking, padding and springs are subjected to grueling machine-controlled torture testing. Impact and spring compression tests pound and roll the bedding, and then all components are carefully examined for damage and wear in a post-test analysis. Only the finest bedding products are permitted to bear the FPI name.

- High-Loft Pad**-Pad made from resilient material to provide softness and comfort.
- Inner-Tufted**-Tuft-stitch that is covered by ticking and generally not visible.
- Insulator Pad**-Pad covering the innerspring.
- Multi-Needle Quilting**-Commercially accepted method FPI employs to quilt mattress ticking for greater durability.
- Open End Offset Coil**-Hourglass shaped spring similar to a Bonnell-type but open at both ends and with no knot.
- Overwrap Pad**-Inner padding used to cover the top and sides of the mattress.
- Staple Cotton**-Yarn quality cotton, used for strength.
- Stitch Tufted**-Tuft formed by stitching through the mattress.
- Ticking**-The top-most mattress covering.
- Topper Pad**-Padding applied on top of the overwrap pad and immediately below the ticking.
- Water-Resistant**-Ticking does not absorb water.

Royal Court Supreme

Plush comfort & posture correct support

Royal Court Supreme

The Royal Court Supreme is our top of the line sleep system

It is a 10" high, posture correct mattress that is available in twin, full and queen sizes

Comfort

—Ticking cover and border are knitted and covered with a fire barrier material

—1" thick thermally bonded fiber batting (fire barrier)

—½" thick open cell foam

Inner Spring Support

—13 gauge tempered steel spring wire

—6 gauge border wire

—448 coil count for Queen size

—392 coil count for Full size

—280 coil count for Twin size

Fill

—½" (firm) or 1" (x-firm) fiber pad

—½" open cell foam cellulose pad

Other Features

—Cover is a quilted luxurious, 100% polyester satin ticking material of Inman Ruby color with a gray floral pattern

—Edge binding is polyester tape with a fire retardant treatment

—High performance thread in compliance with A-A-55195 (Commercial item description for thread)

Flammability

—Passes California Technical Bulletin 129 (Flammability Test for Mattresses for Use in Public Buildings)

—Passes Federal Flammability Standards 16 CFR 1633

Box Spring

—Constructed with spruce or pine wood slats

—Moisture content does not exceed 15%

—Cinched with nails or staples and is square and true

—Bottom edges are blunted by sanding

—Minimum of ½" fire barrier insulator pad is used for fill

—Corners are reinforced with cotton

—Cover is made up of a minimum 6-1/2 oz., 100% polyester knitted blend ticking and matches the mattress fabric

—Bottom cover is a non-woven polyester dust cover

—Plastic corner guards are installed on each corner

Institutional Bunk Mattress

Quality & comfort when you need it most

Institutional Bunk Mattresses

Constructed without innersprings, FPI's Institutional Bunk Mattress provides comfort and durability at an affordable price. Designed for spring link bunk beds or cots, this Grade "C" rated mattress is available in 9 sizes and meets Federal Specification V-M—81F.

The mattress interior, which complies with Federal flammability standards, consists of a polyester batting barrier, filled with a 50/50 blend of staple cotton and cotton linters. The blue and white ticking is stitch-tufted to stabilize lateral motion, relieve bunching and better retain the mattress' shape.

An optional ticking of green vinyl/polyester laminate is available for infirmaries and other special areas being both anti-bacterial and anti-static, this water resistant ticking facilitates cleaning and maintenance by causing most liquids to bead. (Not sold with a box spring). Passes California Technical Bulletin 129. Passes Federal Flammability Standards 16 CFR 1633.

BodyCare Mattress

Quality

Hospital Mattresses

A quality hospital mattress from Federal Prison Industries, for excellent comfort and safety in a hospital environment Federal Prison Industries offers BodyCare, a high-quality, durable infirmary mattress. This ideal hospital mattress is anti-bacterial, anti-static, and easy to maintain. Spills are quickly wiped away due to BodyCare's unique vinyl/polyester laminate ticking, inducing beading in most liquids. Adding comfort to utility, BodyCare has 1-1/2 inches to 2 inches of padded cover over a sturdy open-end offset innerspring. (Not sold with a box spring).

Vent Seal Mattress

Tamper-Resistant, Seamless Mattress

Features and Benefits

Pillow (All-In-One)

- Attached into mattress
- Reversible both sides of mattress to promote longer wear
- Designed to reduce fatigue to neck and back
- Eliminates need for separate pillow and pillowcase
- Available with or without pillow

Durability

- All RF* welded sealed seam construction are fluid proof and prevent tampering for a healthier environment
- Easily cleaned and disinfected-resists bacteria mildew, odors and fluids
- Zero thread seams to break

Valve

- Breathable-In and out

Flammability

- Fire retardant
- Occupational Safety Environmental compliance and Fire Protection Consumer Product Safety Commission: 16 CFR 1632 and 16 CFR 1633. Meets Technical Bulletin 129: Flammability test for high risk occupancy environment

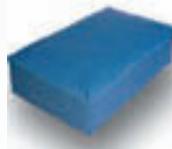

Other Features

Fire retardant

- Lightweight
- Abrasion resistant
- Breathable, stretchable, conforming material
- Pocket style construction-all seams are inside mattress
- Can be used without sheet/cover
- Silver Ion Technology integrated to combat MRSA, resist body fluids, bacteria, and other contaminants-effective 99.99%
