CARRIERS & VESTS

Quality Is Built Into Every Vest

Your protective vest can mean the difference between life and death. We take the manufacture of these garments very seriously, and have stringent quality assurance standards from arrival of the fabric through shipping of the vests.

The fabric is shipped and received under strict security conditions. Certificates of fabric conformance accompany all fabric. The fabric is tagged and can be followed throughout production.

All materials are cut using a pattern certified by the UNICOR quality assurance manager and factory manager, and a factory supervisor ensures that each piece of material is cut properly. Throughout the sewing process, quality assurance checks are made and documented.

Each vest passes a final inspection before it leaves the factory, and each step of the packaging process is closely supervised.

Your Choice of High Grade Ballistic Materials

Kevlar® vests are made of Kevlar® KM2, a tough synthetic aramid fiber that, for its weight, is five times stronger than steel. An aramid fiber is a high strength, low stretch material. It is flame resistant, will not melt, and has been treated to be water repellent. When woven as fabric it becomes virtually impenetrable, providing unsurpassed protection against gunshot wounds. It can minimize injuries from falls, explosions, automobile accidents and fires, yet is comfortable and easy to wear.

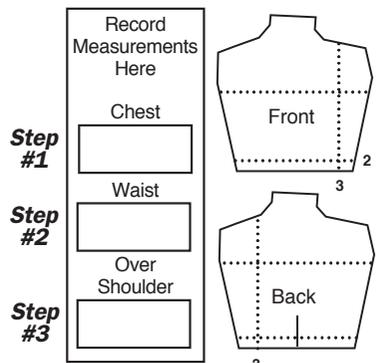

K-Flex®/T-Flex™ is a unidirectional, 0°/90°-oriented non-woven fabric with high-performance fiber materials. K-Flex®/T-Flex® is fifth generation body armor material which produces panels 25%-40% lighter than the lightest aramid panels currently in the marketplace. Each layer weighs no more than 0.04 lbs. per square foot. K-Flex®/T-Flex™ incorporates Kevlar® fibers which are hermetically sealed as the material is produced. Materials are unaffected by perspiration and other wetness. Also K-Flex®/T-Flex™ is not susceptible to performance degradation from heat unlike polyethylene-based ballistic materials.

UNICOR manufactures body armor at two levels of protection: Threat Level II and Threat Level IIIA. These meet the National Institute of Justice (NIJ) Standard 0101.03. Concealable body armor for everyday wear is designed to protect against low and medium energy handguns.
