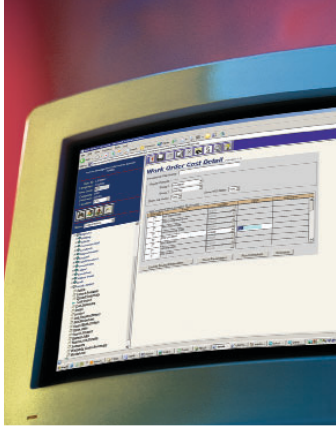
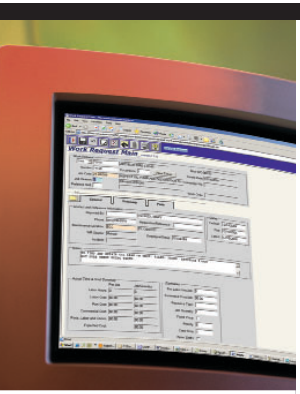
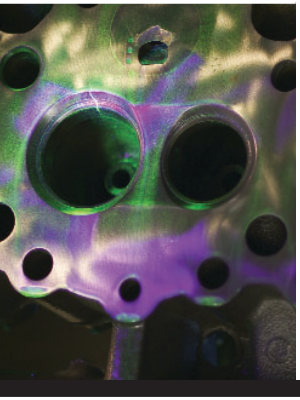
Building an Alliance for a Meaningful Partnership



FLEET MANAGEMENT &
VEHICULAR COMPONENTS





FEDERAL PRISON INDUSTRIES (FPI)

Your Partner in Fleet Management and Vehicular Component Remanufacturing

Federal Prison Industries (FPI) is a leading supplier of Fleet Management, Vehicle Upfit and Vehicular Components Remanufacturing Services to the United States Government.

We're seeking alliances with government agencies and private sector businesses that are prepared to commit their resources and technical expertise and establish a long-term partnership with the Fleet Management and Vehicular Components Business Group.

By partnering with Federal Prison Industries, you will receive a level of service not found elsewhere.

Our new business development group is ready to discuss your needs, and how a long-term alliance with FPI could make your fleet management and maintenance easier, better and more cost-effective.

Partnering with FPI

By partnering with FPI, you gain a service provider that understands the federal environment, and has broad experience across Department of Defense and civilian fleets.

We can customize service solutions to your needs, returning your equipment to operation faster and at less cost than most providers.

As your partner, Federal Prison Industries provides a level of service and attention to detail not found elsewhere.

Your work will be completed and quality-tested in leading-edge facilities that are ISO 9001: 2000 Certified, with ASE certified mechanics. We do everything possible to meet your requirements and stand behind our work with full warranties and guarantees. All parts meet OEM (original equipment manufacturer) specifications.

FPI has the capacity and capability to handle any job, large or small. We can customize our supply systems, component remanufacturing, and retrofitting to meet your specific needs.

Turn-Key Solution

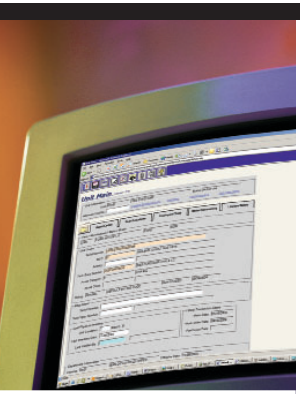
Partnership with Federal Prison Industries also makes your work life easier.

Because we are a corporation wholly owned by the federal government, FPI can offer you the convenience of expedited purchase, cutting out much of the time and red tape involved in commercial contracting.

We offer one-stop shopping for all of your Fleet Management, Vehicle Upfit, and Vehicular Components Remanufacturing needs.

By working with us, you also gain SBA credits due to our high commitment to small and small disadvantaged businesses. Our dedication to small business benefits you and your organization's small business goals.

Through our joint partnership with Maximus, one of the world's leading providers of fleet and public transportation asset and maintenance management software solutions, we also offer the latest Internet-based fleet management program to manage and maintain fleet operations. This includes procurement tracking, asset management, workflow and personnel management, warranty claims management, and fuel management.



Leading Government Provider

Federal Prison Industries (FPI) offers a complete range of retrofitting and upfitting of new vehicles, and remanufacturing of custom components. Our nationwide vehicular components and engine remanufacturing facilities remanufacture and rebuild a wide array of automotive and equipment components.

We are the leading government provider of Fleet Vehicles and Vehicular Component Remanufacturing services.

Our technical specialists can rebuild or remanufacture your vehicle components, engines, electrical equipment, or other equipment, and return them to you in like-new condition at a fraction of the replacement cost.

We have more than half-a-million square feet of factory and warehouse space, and 2,000 highly trained mechanics and technicians with a wide range of skills. FPI facilities are located throughout the nation, and most are **ISO 9001:2000 Certified, with ASE certified mechanics**. All of our work is fully guaranteed and warranted.

As the leading government provider of fleet management and vehicular component remanufacturing services, we have the technology, knowledge and service-orientation to meet your specific fleet requirements.

RANGE OF SERVICES:

Our nationwide network of service, drop-off and distribution centers offer a wide array of fleet maintenance and management services.

State-of-the-Art Painting and Coating Technology

- Provides our partners with the most economical, long-lasting and most durable quality product in the market

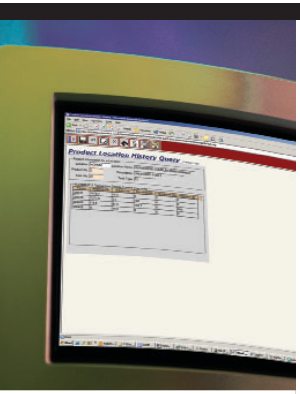
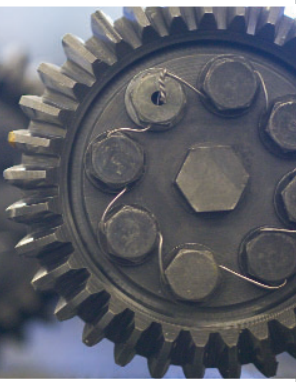
If you don't see what you're looking for in the list above; please contact

Brent Watson, Fleet Program Manager, at bwatson@central.unicor.gov.
He will be happy to provide you with a customized service solution.





PROVEN EXPERIENCE

FPI has a successful record of meeting customers' needs for specialized, timely and cost-effective services under demanding circumstances.

The Marine Corps asked FPI to provide vehicle component remanufacturing services that could return training and combat support equipment to operation within days. We developed a responsive, global vehicular component supply system that helps keep the Marine Corps mission-ready at a moment's notice.

"Our successful partnership with FPI for SECREP items continues to produce big dividends. FPI's cooperative spirit and honorable commitment has won the trust and respect of the Marine Corps Operating Forces."

Lt. Col. Ken Brown
Project Officer
Marine Corps LOGCOM

The newly formed Department of Homeland Security (DHS) urgently needed to upfit and refurbish law enforcement vehicles from over 22 previously separate federal agencies. We met this challenge and continue to provide DHS with a steady stream of upfitted vehicles and components.

"I am very proud of this mutual relationship between Detention & Removal and the Bureau of Prisons that we have forged so far. We're being more responsive to the actual fleet needs of our field offices and at the same time being more efficient and fiscally responsible."

Tony Tangeman
Deputy Executive Commissioner
Detention & Removal

"I am convinced that no one from the private sector can compete with the operation I witnessed on this trip. I was amazed by the professional appearance of the finished vehicle. This project makes sense!"

Michael Moriarity
Deputy Chief US Marshal
Shreveport, LA

Our outstanding record of success with federal agencies and law enforcement groups provides FPI with the knowledge and expertise to support public and private sector customers with their fleet management requirements.
