Terms & Conditions

Terms of Sale

All prices listed are FOB Destination unless otherwise requested and noted.

Billing is Net 30 days on all products. All other services rendered are subject to payment at completion of each phase, when signed off by the customer. All prices are subject to annual review for adjustments. All custom and non-standard products are subject to a customer letter of intent to purchase in good faith, in lieu of a deposit.

Glossary of Terms used within this price list are as follows:

COM - Customer's own material, customer purchased and supplied to UNICOR/FPI.

COL - Customer's own leather, customer purchased and supplied to UNICOR/FPI.

Due Date - Date required for product to be at customer site, installation to begin.

Order Acknowledgment- Written confirmation of acceptance of order, containing the following information; work order number/purchase order number, project manager name and invoicing information.

Receipt of Order - Date UNICOR/FPI receives the order.

Ship Date - Date product ships from UNICOR/FPI factory.

Sales Policy

Products sold through this catalog are intended for federal government customers and their designee, and must be procured with federal funds.

Order Acknowledgment

UNICOR/FPI accepts orders, manufactures products, provides installation services and invoices based on the customer's request. The written order confirmation is verification and confirmation that requirements have been correctly translated to a sales order. An acknowledgment will be provided in writing, by fax or e-mail. If there is any information discrepancy in your order acknowledgment, please advise us immediately to avoid any miscommunication or problems. Communications should be directed to the assigned project manager listed on your order acknowledgment. Your order will be invoiced based on your request. Standard process is for product to be billed when it ships and the services are billed after confirmation of acceptance from the customer. Requests for billing, other than through the standard method, must be identified on the customer purchase order.

Your order acknowledgment indicates a date when your product is scheduled to arrive. In the event your order is manufactured earlier than scheduled, we will contact you with the option of providing an early shipment authorization. This will be coordinated through the project manager.

Order Modifications

Modification to your purchase order will be accepted up to two weeks prior to the due date indicated on your order acknowledgment. However, any modification made after production has begun, which changes the due date, product requested, or quantity requested will be subject to additional charges. For example, a delay in the delivery date could result in storage charges, a change in the quantity may result in a new ship date, or cancellation after the order is in production is subject to restocking fees. All purchase order modifications will be acknowledged in writing, including the annotation of any adjusted delivery dates and/or charges. UNICOR will assist the customer in obtaining storage for their product if delays in receipt are necessary. Product will not be stored at the UNICOR locations beyond 15 days, all storage will be arranged by our installation vendors or at the customer location.

Standard Lead Time

Typical lead time for products with this price list is 45 days ARO (after receipt of order). Orders which include custom items, e.g., COM, COL or special fabrics may require a longer manufacturing cycle. The extended date will be reflected on your order acknowledgment. The project manager, listed on your order acknowledgment, will gladly discuss your options with you.

Product Delivery and Pricing

All pricing listed in this publication is FOB Destination, CONUS (Continental United States) only, unless otherwise noted. Freight charges are included in the product price as listed in the FOB Destination column. FOB Origin pricing is available upon written request through, the UNICOR/FPI Customer Service Center.

On FOB Destination orders, the ownership responsibility passes to the customer at the time the product is accepted at the designated off-load point. Responsibility for inside delivery passes to the customer at final placement, or as specified in writing by the project manager.

On FOB Origin orders, UNICOR/FPI can arrange a coordinated delivery with the carrier of your choice. If no carrier is specified at time of order, it will be shipped common carrier, using our contract carrier at your expense. Freight charges will be added to your invoice.

Services, such as space planning, storage, inside delivery and installation are available at competitive prices. UNICOR/FPI offers both fee for service and negotiated pricing tailored to each project. Contact your sales representative or project manager to discuss these services.

Special Note: On shipments "Out of CONUS", FOB Destination orders, shipments are prepaid to the designated point of debarkation. Freight and handling charges beyond the point of debarkation are the responsibility of the local purchasing/governing agency, unless other arrangement are made with the project manager. The freight charges for deliveries out of CONUS, including Alaska and Hawaii, will be negotiated and quoted at competitive freight rates, at time of shipment.

Packaging of Product

UNICOR/FPI products are packaged to comply with carrier requirements to insure that products arrive in excellent condition. UNICOR/FPI can accommodate special packaging requests, special identification markings and special delivery instructions. Normally, this is a fee-for-service option. Contact your project manager to discuss options.

Direct Shipment Claims

UNICOR/FPI products are inspected and packaged to comply with shipping carrier requirements prior to leaving the manufacturing site. All shipments need to be inspected by the consignee, before acceptance. At the time of acceptance, any visible damage or shortage of items must be recorded with the freight carrier and reported to the UNICOR/FPI project manager immediately. Claims for visual shipping damage and/or shortage must be filed within 12 days of receipt of product. This applies to both FOB Destination and Origin shipments.

UNICOR/FPI reserves the right to use contracted carriers or commercial carriers for "best method" shipments. Any other shipping requirements must be negotiated with the project manager prior to shipping.

Concealed Damage Claims

By utilizing improved packaging and handling UNICOR/FPI takes great care to avoid concealed damages. UNICOR/FPI recommends inspection of all products within 12 days of delivery for both FOB Destination and Origin shipments, in order to insure prompt shipment of a replacement, and determination of liability.

Product Storage

UNICOR/FPI will provide free storage for up to 15 calendar days from original ship date. However, if additional time is needed, UNICOR/FPI can arrange for storage at current rates. Discuss the options with your project manager.

Customer Delayed Deliveries

UNICOR/FPI will accommodate requests to delay your order if we are notified two weeks before the product is scheduled to ship. The request for delay must be made as soon as possible. Contact your project manager to discuss date changes. If product is already in production at the time of delay notification, storage arrangements must be coordinated through your project manager. If product is en route, in most cases the product can be diverted to a storage location designated by the customer, or UNICOR/FPI can arrange storage at an additional cost. Costs usually include loading and unloading of product, plus any warehousing/storage cost. Order modifications are required when additional costs are incurred and are invoiced to you on your order.

Product Returns

Any product returns must be negotiated with the project manager. The terms and conditions will be evaluated on a case by case basis through negotiation with the project manager. UNICOR/FPI reserves the right to inspect the returned product and evaluate the resale value of the product when considering a credit or exchange.

Product Order Status

Order status can be verified by:

- (1) Contacting your project manager (name and phone number are listed on your order acknowledgment).
- (2) Making an inquiry at www.unicor.gov/customer/index.htm - Enter your work order / purchase order number, for a shipping status report for your order. Credit card order delivery status can be verified by logging the last name of the card holder in the purchase order number box.

Shipped orders will be identified by a tracking number in response to your inquiry. If a tracking number is not reported, contact the project manager for a current status report.

Invoice Payments

All general billing questions should be directed to UNICOR/FPI Customer Service Center, in writing to the following address:

FPI - LEX
Accounts Receivable
P.O. Box 11670
Lexington, KY 40583-3640

Send payments from government agencies to the following address:

FPI - FPI
P.O. Box 371736
Pittsburgh, PA 15252-7736

U.S. Department of Justice

UNICOR

Federal Prison Industries, Inc.

Terms & Conditions

Send Payments from sources other than government agencies to the following address:

FPI - LEX
Accounts Receivable
P.O. Box 11670
Lexington, KY 40583-3640

Product Warranty

UNICOR/FPI guarantees all product to meet or exceed the standard commercial life expectancy of the product. UNICOR/FPI will repair or replace any defective product promptly, during the life expectancy of that product. UNICOR/FPI does warranty all product to be free of defects in material and workmanship. This does not apply to any COM or COL fabrics supplied by sources other than UNICOR/FPI.

COM Fabric Requirements

All fabric or upholsteries must be approved prior to acceptance of an order. Upon approval a memo sample swatch must accompany the order. UNICOR/FPI assumes no responsibility for wear or defects of performance of any COM or COL supplied by sources other than FPI.

Use of COM as panel fabrics require UL approval and must be tested for approval prior to acceptance of an order. UNICOR/FPI will require three yards of the actual panel fabric to be tested prior to quoting.

All COM fabric or upholstery must be received in continuous linear yards. UNICOR/FPI requires a 5 to 10% overage clause to insure appropriate amount of coverage.

COM Material Acceptance

UNICOR/FPI reserves the right to reject COM fabrics or upholstery that are not suitable for the intended application. Customer selecting any COM or COL takes responsibility of performance of the supplied product.

XXI Notes Worksurfaces

General Information

Basic Worksurfaces

WBW

p. 8

Adjustable Keyboard Pad Worksurfaces

WAK

p. 10

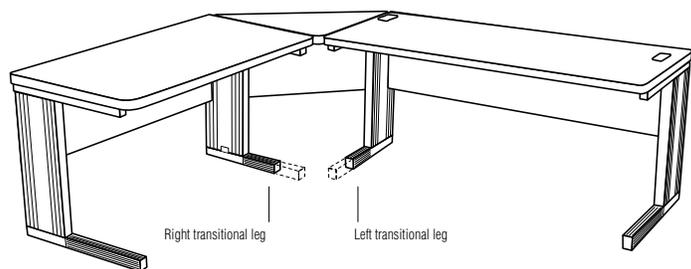

Transitional Worksurfaces

CT

p. 26

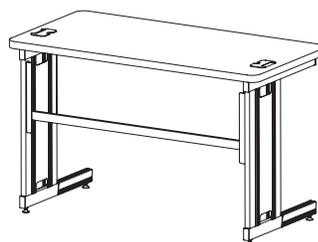

Features

Solid core top	•	•	•
Plastic laminate surface	•	•	•
Seam-welded tubular steel frame	•	•	•
Chrome plated glides	•	•	•
Enamel legs	•	•	•
3mm PVC edge	•	•	•
Flat vinyl T-edge	•	•	•

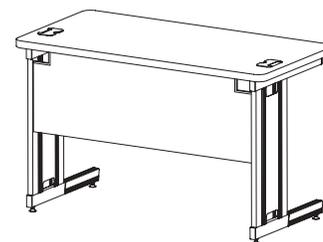

Transitional Leg

Transitional leg bases are 6 inches shorter than standard leg bases for greater leg room and chair clearance when two surfaces are joined. When seated at the worksurface, "right" or "left" refers to the individual worksurface, not the assembled workstation. Cannot be ordered for an individual, free-standing worksurface.

Beam Frame (WB)

Modesty Panel Frame (WM)

SPECIFICATIONS

Worksurface Frames

Heavy-gauge seam-welded powder-coat finished tubular steel. Horizontal table top support tube, 16-ga., 1" x 2" steel. Floor support member, 16-ga., 1" x 2" steel tube. Top floor support tubes are welded with (2) 16-ga., 1" x 2" vertical leg members. 19-ga. steel modesty panel. Leg interior provides concealed management of wire from floor to worksurface. Adjustable chrome-plated glides.

Worksurface Frame Options

There are two frame style options. The modesty panel (WM) is 19-ga. steel. It is located 1-1/2" from the backside of the worksurface. The modesty panel is 13.31"H on the 27"H worksurfaces and 15.31" on the 29" tables. The receptacle clearance beam option (WB) replaces the modesty panel with a 16-ga., 1/2" x 1-1/2" steel tube cross brace, welded to two 14-ga., L-brackets for support.

Worksurface Top

1/4" thick consisting of high-density particleboard, .050" high-pressure plastic laminate top surface with .045" phenolic backing sheet. Available with flat-vinyl T-edge and 3mm PVC edge.

Transitional Surface Splice Plates

Die-formed steel splice plates attach to underside of units with screws. Splice plates are provided with Transitional Surfaces only. Standard connector plate provided when surfaces are of common height. Step connector plate provided for connecting 29" to 27" surfaces. Basic and keyboard worksurfaces are not provided with splice plates.

Adjustable Keyboard Pad Worksurface

Die-formed L-brackets attach to table and keyboard pad with screws. Threaded hand knobs lock keyboard pad in position. Available with flat vinyl T-edge only.

Wire Management

3" x 2" openings with protected edges are provided for all worksurfaces. On basic adjustable keyboard worksurfaces and rectangular transitional surfaces, the grommets are located at the top of the modesty panels on both sides. On the end-of-run square, corner and peninsula transitionals, the grommet is located in the top center. The triangular transitional does not have a wire management grommet.

Weight Capacity

All XXI Notes tables exceed ANSI/BIFMA 5.5 Standards. All XXI Notes tables have been tested to withstand a weight of 10 pounds per lineal inch of worksurface evenly distributed along the entire length of the worksurface. Please contact Customer Service for additional information.

Wireway Option

Wireway trough connects to existing openings at top of modesty panels and is constructed of 19 gauge steel with 1" deep by 1 1/2" high opening for cables. Wireway option is not available with Beam Frame (WB).

Scuff Guards

Extruded rigid PVC scuff guards cover the foot on all XXI Notes legs. The scuff guard's finish matches the finish for the corresponding leg insert style, either extruded ribbed texture or a sprayed clear acrylic texture.

**ORDERING INFORMATION****Modesty panel codes:**

- M** = With modesty panel
B = With beam frame

CODES FOR POWER UP:**Data location:**

- L** = Left
R = Right
C = Center
B = Left and right. Only available on 60" x 72" worksurfaces.

Accessory level:

- L1** = Consists of one or two PowerUp modules with 108" cord.
L3 = Consists of one or two PowerUp modules with 108" cord plus data door with steel divider, table-to-table steel wireway, splice plate and notched vertical wireways.

L5*** = Consists of one or two power modules with 22" cord, data door with steel divider, table-to-table steel wireway, splice plate, notched vertical wireways, eight-wire four circuit pre-wired harness.

L2 = Consists of data door with steel divider, table-to-table steel wireway, splice plate and notched vertical wireway.

L4*** = Consists of data door with steel divider, table-to-table steel wireway, splice plate, notched vertical wireway, eight-wire four circuit pre-wired harness.***Duplex receptacles must be ordered separately. See page 112.

***Floor infeed (four-circuit pre-wired) must be ordered separately. See page 112.

***Eight-wire table-to-table connector must be ordered separately. See page 112.

Floor Infeed (Four-Circuit Pre-wired)

Two 90° connectors. Flexible steel conduit with eight 12-gauge conductors in the leg. Includes steel trim plate with dual holes for electrical and data entry.

HOW TO ORDER

Indicate the following information on order form:

1. Quantity of each item.
2. Model number, including options. See "How to Build a Model Number."
3. Any special service required.

- Note:
- The indicates that a choice is required.
 - The absence of indicates that no choice is required.
 - Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select size of worksurface.

- B** Select edge style.
T = Flat Vinyl T-edge
M = 3mm PVC edge

- C** Select height.
7 = 27"
9 = 29"

- D** Indicate location and type of leg.*
S = Standard (both standard legs)
R = Right (right transitional leg)
L = Left (left transitional leg)
B = Both (both transitional legs)

*Note: If ordering Basic Worksurface as a freestanding unit, or if only one side connects to a transitional worksurface, the "B" option for both transitional legs is not available.

• Must order corresponding worksurface connector to attach to adjacent table when using transitional legs.

- E** Select frame style.
B = With beam
M = With modesty panel

- F** Select trim color for painted surfaces.
B = Black
G = Gray
S = Sand
W = Warm Gray
L = Light Tone

- G** Select laminate surface.
AA = Cream
AB = Champagne
AC = Barcelona
AD = Tidal Sand
AE = Porcelain
AF = Aruba Tan

- AG** = Black
AH = Dark Gray
AI = Dawn Gray (Greige)
AJ = Fog
AK = Black Grandin
AL = Smoke Granite
AM = Sand Grandin
AN = Light Granite
AO = Tundra
AP = Earthen
AQ = Rose Grafix
AR = Shale Grafix
AS = Sierra Grafix
AT = Beige Grafix
AU = Sand Stone
AV = Kentucky Walnut
AW = Tennessee Oak
AX = Light Oak
AY = Red Birch
AZ = Ash

HOW TO ORDER

Indicate the following information on order form:

1. Quantity of each item.
2. Model number, including options. See "How to Build a Model Number."
3. Any special service required.

- Note:
- The indicates that a choice is required.
 - The absence of indicates that no choice is required.
 - Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select size of transitional worksurface.
B Specify edge style.
T = Flat Vinyl T-edge
M = 3mm PVC edge
C Select height.
9 = 29"
D Select trim color for painted surfaces.
B = Black
G = Gray
S = Sand
W = Warm Gray
L = Light Tone

- E** Select laminate surface.
AA = Cream
AB = Champagne
AC = Barcelona
AD = Tidal Sand
AE = Porcelain
AF = Aruba Tan
AG = Black
AH = Dark Gray
AI = Dawn Gray (Greige)
AJ = Fog
AK = Black Grandin

All square, rectangular, and triangular transitional surfaces connected at the same height do not require Right (R) or (L) transition direction. Use "X" for transition direction. Transitional direction required for "97" transitional height.

HOW TO ORDER

Indicate the following information on order form:

1. Quantity of each item.
2. Model number, including options. See "How to Build a Model Number."
3. Any special service required.

- Note:
- The indicates that a choice is required.
 - The absence of indicates that no choice is required.
 - Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

A Select size of transitional worksurface.

B Select edge style.
T = Flat Vinyl T-edge
M = 3mm PVC edge

C Select transition direction.*
L = Left
R = Right
X = None

*Transition direction is determined from the originating 24" or 30" basic or keyboard pad worksurface.

D Select transition height.
9 = 29" to 27"

E Select trim color for painted surfaces.

B = Black
G = Gray
S = Sand
W = Warm Gray
L = Light Tone

F Select laminate surface.

AA = Cream
AB = Champagne
AC = Barcelona
AD = Tidal Sand
AE = Porcelain
AF = Aruba Tan
AG = Black
AH = Dark Gray
AI = Dawn Gray (Greige)
AJ = Fog
AK = Black Grandin

When ordering an end-of-run worksurface, the adjoining worksurface must have a transitional leg. Order a right transitional, left transitional or both transitional.

HOW TO ORDER

Indicate the following information on order form:

1. Quantity of each item.
2. Model number, including options. See "How to Build a Model Number."
3. Any special service required.

- Note:
- The indicates that a choice is required.
 - The absence of indicates that no choice is required.
 - Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select size of end-of-run worksurface.
- B** Select edge style.
T = Flat Vinyl T-edge
M = 3mm PVC edge
- C** Select transition direction.
L = Left
R = Right
- *Transition direction is determined from the originating 24" or 30" basic or keyboard pad worksurface.
- D** Select end-of-run height.
7 = 27"
9 = 29"

- E** Select trim color for painted surfaces.
B = Black
G = Gray
S = Sand
W = Warm Gray
L = Light Tone
- F** Select laminate surface.
AA = Cream
AB = Champagne
AC = Barcelona
AD = Tidal Sand
AE = Porcelain
AF = Aruba Tan
AG = Black
AH = Dark Gray
AI = Dawn Gray (Greige)
AJ = Fog
AK = Black Grandin
AL = Smoke Granite

- AM** = Sand Grandin
AN = Light Granite
AO = Tundra
AP = Earthen
AQ = Rose Grafix
AR = Shale Grafix
AS = Sierra Grafix
AT = Beige Grafix
AU = Sand Stone
AV = Kentucky Walnut
AW = Tennessee Oak
AX = Light Oak
AY = Red Birch
AZ = Ash
BA = Philadelphia Cherry
BB = Pennsylvania Cherry
BC = Mahogany
BD = Oak
BE = Maple

p. 32

Features

Formed steel construction	•	•
Casters (optional)	•	•
Solid core top		•
Plastic laminate surface		•
Adjustable glides	•	•

SPECIFICATIONS

Universal Printer Stand

Seam-welded 40 sheen powder-coated tubular steel frame. Horizontal top member and foot are 16-ga. 1 x 2"; vertical leg member 16-ga., 1 x 3". Trays are 14-ga. formed steel. Slide-out forms loading tray and paper catch tray with three vertical adjustments. Adjustable platform in 2 sections, locked with thumb screws and faced with plastic anti-vibration pad. Platform sections of 16-ga. formed steel welded to 14-ga. brackets. Adjustable chrome-plated glides.

Optional Casters

2" hard plastic wheels. Swivel casters, 2 are lockable. Raises worksurface height 2".

Wire Management

3 x 2" openings with protected edges are provided for all worksurfaces on both sides at top of modesty panels.

Basic Printer Stand Receiver Basket

Solid ½" steel rod construction, zinc plated finish; 31 x 21½". Fastens to printer stand underside at back.

WOC and WDS Models:

Overhead Width	Door Overhang In Open Position	No. Of Doors	Inside Width of Overhead	Dimension Between Side Sets at Worksurface
30"	3/4"	1	27"	25 1/4"
36"	3/4"	1	33"	31 1/4"
42"	3/4"	1	39"	37 1/4"
48"	3/4"	1	45"	43 1/4"
54"	3/4"	2	2 x 25 1/8"	49 1/4"
60"	3/4"	2	2 x 28 1/8"	55 1/4"
72"	3/4"	2	2 x 34 1/8"	67 1/4"

Overall height from worksurface to top of overhead is 34".
Overhead allows for 18 1/2" clearance from worksurface to underside of shelf.

WFDS, WFDF, WFDL Models:

Overhead Width	Door Overhang In Open Position	No. Of Doors	Inside Width of Overhead	Dimension Between Side Sets at Worksurface
30"	3 1/2"	1	29 1/2"	27"
36"	3 1/2"	1	35 1/2"	33"
42"	3 1/2"	1	41 1/2"	39"
48"	3 1/2"	1	47 1/2"	45"
54"	3 1/2"	1	53 1/2"	51"
60"	3 1/2"	1	59 1/2"	57"
72"	3 1/2"	2	2 x 35 1/2"	2 x 34"

Overall height from worksurface to top of overhead is 36".
Overhead allows for 19 1/2" clearance from worksurface to underside of shelf.

SPECIFICATIONS**Overheads (WFDS, WFDF, WFDL Models)**

Constructed of 18 gauge steel back, side panels and door front. Supported by 16 gauge steel uprights with concealed vertical wire management to conceal task light cord. Uprights are secured to top of steel legs through grommet holes. The steel door front is of honeycomb core construction with an enamel finish. Steel door front is available with upholstery or covered with high pressure laminate over particleboard core. Door front operates on a rack and pinion gear system utilizing a center lock mechanism. Door front stores recessed inside the cabinet with the dual durometer handle exposed. 72" overhead consists of two cabinets supported by a 16 gauge steel bracket located in the middle. Middle bracket is attached to the underside of the worksurface.

Overheads (WOC, WDS Models)

5/8" Novaply with .050 laminate on the faces with vinyl edging. Slides are steel with steel ball bearings. Exceeds BIFMA requirements. Steel

construction lock has five tumblers. Overhead locks can be keyed alike to match pedestals. Overheads also available with fabric finish.

Privacy Screen

Two 1/2" Gypsum boards joined together with industrial adhesive. Attaches to the rear of the worksurface using two or three 1/8" cold rolled steel brackets. Brackets attach to privacy screen with fasteners. Steel splice plates run the full height of the screen to align adjoining privacy screens. Privacy screen is 19 1/2" high above worksurface.

Overhead Privacy Screen

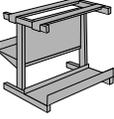

Same construction as basic privacy screen except that it mounts flush to the back of the overhead and is attached to the back of the overhead as well as to the underside of worksurface. Overhead privacy screen is attached to the overhead and worksurface with fasteners. Middle support bracket on 72" overhead attaches to underside of worksurface. Cannot be used with laminated overhead storage (WOC and WDS models).

INFORMATION**Warranty**

See "Terms" for general information.

HOW TO ORDER

Indicate the following information on order form:

1. Quantity of each item.
2. Model number, including options. See "How to Build a Model Number."
3. Any special service required.

- Note:
- The indicates that a choice is required.
 - The absence of indicates that no choice is required.
 - Alpha-numeric characters in place of indicate that no other alternatives are available.

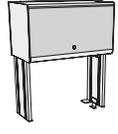

HOW TO BUILD A MODEL NUMBER

- A** Select size of overhead. Length of overhead must be identical to length of worksurface.

- B** Select flipper door position.

L = Left

R = Right

- C** Select trim color for painted surfaces.

B = Black

G = Gray

S = Sand

W = Warm Gray

L = Light Tone

- D** Select laminate surface.

AA = Cream

AB = Champagne

AC = Barcelona

AD = Tidal Sand

AE = Porcelain

AF = Aruba Tan

AG = Black

AH = Dark Gray

AI = Dawn Gray (Greige)

AJ = Fog

AK = Black Grandin

AL = Smoke Granite

AM = Sand Grandin

AN = Light Granite

AO = Tundra

AP = Earthen

SPECIFICATIONS

Tool Rail

Aluminum extrusion tool rail, powder-coated finish. Attaches between overhead uprights. Consists of four slots to accept paper management components. To be used on WFDS, WFDF, WFDL, and WSS models only.

Paper Tray

Constructed of injection molded plastic. Tray measures 9½" wide by 2" high by 14" deep and accommodates both letter and legal size documents. Includes three hooks to mount on tool rail.

Vertical Storage

Constructed of injection molded plastic. Holder measures 5" wide by 9" high and 10½" deep. Includes two hooks to mount on tool rail.

Pencil Cup

Constructed of injection molded plastic. Cup measures 4" wide by 3" high by 3½" deep for storage of pens, pencils, and highlighters. Includes one hook to mount on tool rail.

Hanging Folder Holder

Constructed of injection molded plastic. Holder consists of a pair of stepped brackets providing orderly file access above the desk. Each bracket is 1" wide by 2" high by 8½" deep and includes two hooks to mount on tool rail.

Diagonal Storage

Constructed of injection molded plastic. Storage tray consists of three diagonal slats with black dividers to sort files or papers. Tray measures 7" wide by 2½" high by 12½" deep and includes three hooks to mount on tool rail.

Telephone Caddy

Constructed of injection molded plastic. Caddy measures 8½" wide by 2" high by 9½" deep. Includes adjustable rail to accommodate a phone up to 10¼" deep. Includes three hooks to mount on tool rail.

CD Holder

Constructed of injection molded plastic. Holder measures 5½" wide by 2" high by 7" deep and includes two hooks to mount to tool rail. Holder accommodates up to 10 CDs.

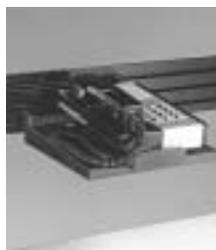

Accessory Tray

Constructed of injection molded plastic. Holder measures 9½" wide by 2" high by 10" deep and includes three hooks to mount to tool rail. Tray includes six compartments for storage of supplies.

SPECIFICATIONS

Work Bar

Aluminum extrusion load bar, epoxy powder coated. To be used on WOC, WDS, DS, and WOS models only.

Letter Tray

20-ga. epoxy powder coated steel, and plastic molded in color, then painted to assure color match. Steel and plastic joined permanently by sonic welding. Roll formed steel clip for component attachment to work bar. ID clips included with tray.

Binder Bin

20-ga. epoxy powder coated steel, and plastic molded in color, then painted to assure color match. Steel and plastic joined permanently by sonic welding. Roll formed steel clip for component attachment to work bar. ID clips included with tray.

Slanted Storage

24-ga. epoxy powder coated steel, and plastic molded in color, then painted to assure color match. Steel and plastic joined permanently by sonic welding. Roll formed steel clip for component attachment to work bar.

Task Lights

Task lights are available in three levels of efficiency and cost. The standard light has a magnetic high-power factor ballast with rapid start, cool-white T-8 fluorescent lamp. The energy efficient model has an electrical ballast with rapid start and cool-white T-8 fluorescent lamp. The third model has a 2-step (hi/low) high-power factor ballast with rapid start and cool-white T-8 fluorescent lamp which helps reduce glare on computer screens and helps reduce eye strain.

Task Lights attach to the underside of the shelf on overhead cabinets. Lights are UL listed and available in the four trim colors. They are available 20" wide for use with 30" and 36" wide overhead cabinets, 32" wide for 42" and

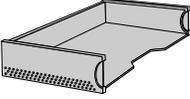

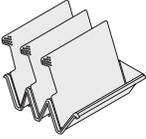

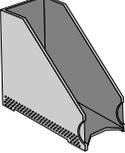

48" wide units, and 44" wide for 60" and 72" wide units.

CPU Sling

The CPU Sling straps have positive locking strap clamps that keep the CPU firmly in place. The CPU Sling is mounted below the worksurface and provides 5½" of travel and 359° swivel for ease of accessibility. Front and rear bumpers prevent over travel. The mounting bracket is 18" deep by 5¾" wide. The CPU Sling is available in black finish only. The maximum weight capacity is 75 pounds and accommodates CPUs with maximum circumference of 65". The mounting bracket serves as a template showing hole locations. Assembly instructions are included with each unit. Sling is available on 30" deep worksurfaces only.

ADJUSTABLE XXI NOTES SPECIFICATIONS

Adjustable Worksurface Frames

The frame consists of two-piece welded 16-ga. formed steel outer legs and 14-ga. 1½" x 2½" rectangular steel tubing inner legs. Legs are 1" x 2" 14-ga. rectangular tubing attached to 11-ga. formed steel cross channels. Worksurfaces are supported by ¼" thick steel support arms. All frames are 40 sheen powder-coated.

Adjustable Worksurface Top

1¼" thick consisting of Novaply particle board with a .045" phenolic backing sheet.

Available with .050" high-pressure laminate and flat vinyl T-edge and 3mm PVC edge.

Wire Management

1" x 4" x 12" leg cavity with removable cover for easy access. Worksurfaces are designed with 2" x 4" grommets for optional worksurface access. Formed powder-coated steel wire trough 1" x 2" available at an upcharge. Integral 1" x 2" wire management mounted between lower leg assembly.

Height Adjustment

Tables are adjustable from 23" to 34". Adjustments are accomplished by a chain driven sprocket mechanism. Adjustment rate of 10 turns per inch. Height adjustment is located on left and right sides of worksurface.

Standards

Meets or exceeds all ANSI/HFS100—1988, BIFMA, and ADA requirements.

Modesty Panels

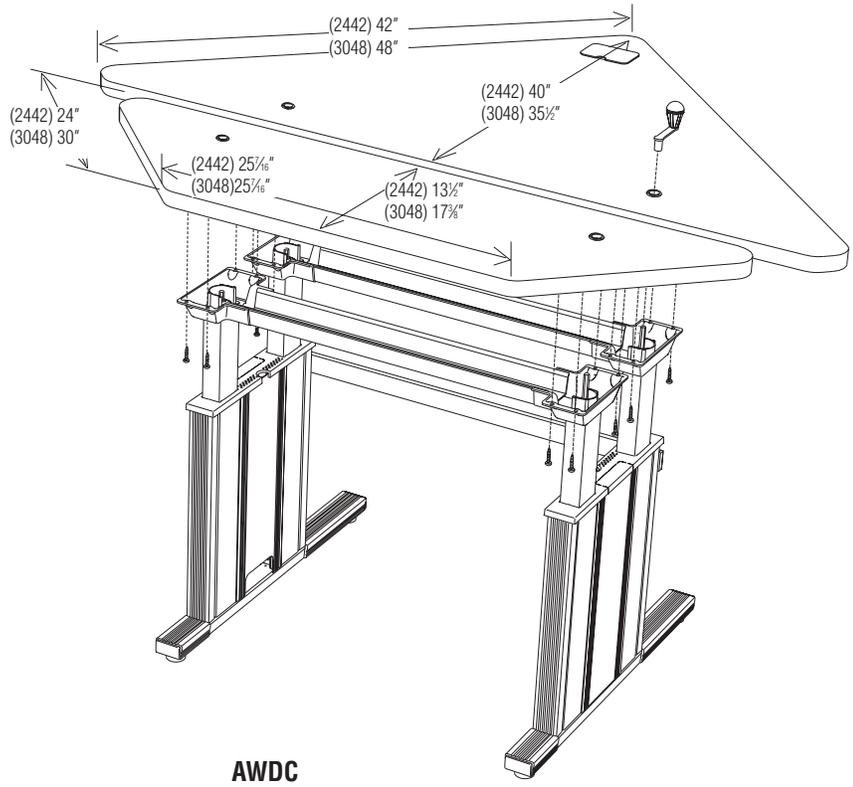

Formed 18-ga. steel powder-coated modesty panel. Attaches to worksurface and conceals area 7" below worksurface.

Optional Casters

Four swivel casters. Two with locks. Raises worksurface height 3".

Glides

Standard with chrome-plated adjustable glides.

Overhead Storage

**Steel Overhead Cabinet with Steel Door**

- Steel bottom, top shelf, and front with enamel finish
- Double bit lock is included with key alike option
- Door stores recessed with handle exposed
- Shelf depth is 13¼"
- 72" overhead not available
- Attaches to leg
- Only attaches to single surface for overhead worksurface
- Meets all BIFMA standards: X5.6-1986, Section #s 8.2, 8.3, 8.4, 8.5 and 13
- **Cannot be mounted on tables with casters.**

XXI Notes with PowerUp

General Information

SPECIFICATIONS

Worksurface Frames

Heavy-gauge seam-welded powder-coat finished tubular steel. Horizontal tabletop support tube, 16-ga., 1" x 2" steel. Floor support member, 16-ga., 1" x 2" steel tube. Top floor support tubes are welded with (2) 16-ga. 1" x 2" vertical leg members. Leg interior provides concealed management of wire from floor to worksurface. Adjustable chrome-plated glides.

There is one frame style for XXI Notes with PowerUp. The modesty panel is 19-ga. steel. It is located 1-1/2" from the backside of the worksurface. The modesty panel is 13.31"H on the 27"H worksurfaces and 15.31" on the 29" tables.

PowerUp Power/Data Module

The power/data module is inserted into a rectangular hole in the worksurface. The module has a flip-up cover and is 6 1/4" long x 3" wide x 2 1/2" high. The cover locks in the upright position to allow cords to be unplugged without the cover closing. The cover is unlocked and returned to the down position by pushing two tabs. It has one duplex receptacle (110 volts), dual data ports and a power cord with a 3-prong plug. The cord is 22" long when used with Level Five tables and 108" long when used with Level One and Level Three tables. Level One tables have a 16-gauge U-shaped steel guard that is attached to the underside of the worksurface to protect the module. Modules are not used on Level Two and Level Four tables. The PowerUp module provides for two AT & T brand connectors. Connections for phones, modems, printers and networks can be incorporated into the system, but must be ordered separately by the customer through a third party source. Communications wiring is completed in the field by the customer. Other brand name connectors, for example: AMP and Panduit, may be accommodated. Contact Customer Service for more information.

The module is available on 24" and 30" deep rectangular worksurfaces. The module is not available on the printer worksurfaces, square corner worksurfaces or D-shaped peninsula worksurfaces. One module is standard on surfaces for Levels One, Three and Five. The single module is located at the rear right, rear left or center position of the worksurface. Two modules are available on 60" and 72" wide surfaces and are located at the rear left and rear right position of the worksurface.

The PowerUp module is available in five standard colors: B (Black), G (Gray), W (Warm Gray), L (Light Tone) and S (Sand).

Data Door

The data door is constructed of rigid PVC .06 wall thickness with a radius of 2 1/2". The door is 8" deep and is 4 1/2" high. It attaches to the underside of the table top and to the inside of the modesty panel. Power and data cables are separated from each other by a 24-gauge steel divider that is 2" high by 2 3/4" deep. There is also space allowed for cord management.

Table-To-Table Wireway

The table-to-table wireway is a 16-gauge steel trough that attaches to the underside of the adjoining table tops. The wireway is 3 3/4" deep by 4 1/4" wide. The wireway routes the eight-wire table-to-table connector and data wires between tables. The table-to-table wireway also includes a splice plate that attaches the front of the adjoining tops together to prevent separation.

Eight-Wire Four-Circuit Pre-Wired Harness

Single sided, rigid eight-wire harness that holds two duplex receptacles (60" and 72" wide tables provide four duplex receptacles. Duplex receptacles are located under the worksurface). The harness has mounting brackets to attach to the underside of the table top with screws. The harness is 2 1/2" wide and the length of the harness varies with the size of the top. Power is obtained by use of the Eight-Wire Power Infeed Kit.

Eight-Wire Table-To-Table Connector

Eight-wire table-to-table connector consists of plastic coated flexible conduit which provides power connections from adjoining tables. The jumper is 18 1/2" long and is routed through the table-to-table wireway.

Eight-Wire Power Infeed Kit

The eight-wire infeed kit provides power from fixed, floor, or wall sources to the eight-wire harness. It includes six feet of plastic covered flexible conduit, and 1/2" waterproof 90° connector. Also included are two steel covers which replace the existing plastic vertical wireway.

Horizontal Wire Management Trough

Horizontal wire management trough (WW) connects to existing openings below the worksurface top and is constructed of rigid PVC with 1" deep by 1-1/2" high openings for cables.

Notched Leg Insert Wire Management

The notched leg insert (CW) allows wires to be routed to adjoining tables on both sides of the centrally located table. There is a notch located at the top of the leg insert.

PowerUp On XXI Notes Applications

Level One

Level One consists of one or two PowerUp modules with 108" cord for instances where laptops are used but under the worksurface wire management is not crucial. An optional Wire Management Trough (WW) is offered. Example: when a user is interested in only the power aspect of the module and will not run data wires.

Level Two

Level Two consists of data door with steel divider, table-to-table steel wireway, splice plate, and notched leg insert wire management. For instances where laptops are not used; therefore, the surface module is not required; however, it is necessary to conceal the cords and wires. Example: a computer lab where extension cords are used to plug in desktop computers. Note: Power supply cords are not to be routed across or through more than one complete unit/worksurface.

Level Three

Level Three consists of one or two power modules with 22" cord, data door with steel divider, table-to-table steel wireway, splice plate, notched leg insert wire management, eight-wire four circuit pre-wired harness. For instances where laptops are used and it is necessary to conceal cords and wire. Example: a computer lab where extension cords are used to plug in a desktop computer (under the worksurface) plus there needs to be a provision for laptops.

Level Four

Level Four consists of data door with steel divider, table-to-table steel wireway, splice plate, notched leg insert, eight-wire four circuit pre-wired harness. For instances where a prewired four-circuit harness is required. Example: several desktop computers per row but laptops are not required. Duplex receptacles, floor infeeds, and eight-wire able-to-table connectors must be ordered separately.

Level Five

Level Five consists of one or two power modules with 22" cord, data door with steel divider, table-to-table steel wireway, splice plate, notched leg inserts, eight-wire four circuit pre-wired harness. For instances where a prewired four-circuit harness is required. Example: several desktop computers per row plus the need to provide for laptops. Duplex receptacles, floor infeeds, and eight-wire able-to-table connectors must be ordered separately.

UL Listed

The XXI Notes with PowerUp System is listed to applicable UL standards and requirements by Underwriters Laboratories Inc.

Two of the standards used to evaluate XXI Notes are UL/286 Office Furnishings and UL/723 Standard for Test for Surface Burning Characteristics of Building Materials.

The standard used to evaluate PowerUp is UL 1363 Relocatable Power Taps.

Surface Splice Plates

Die-formed steel splice plates attach to underside of units with screws. Two splice plates are provided with all surfaces. Standard connector plate provided when surfaces are of common height. Worksurface height change connector provided for connecting 29" to 27" surfaces on transitional height worksurfaces. Specify worksurface height change connector for connecting non-transitional worksurfaces of two different heights.

Scuff Guards

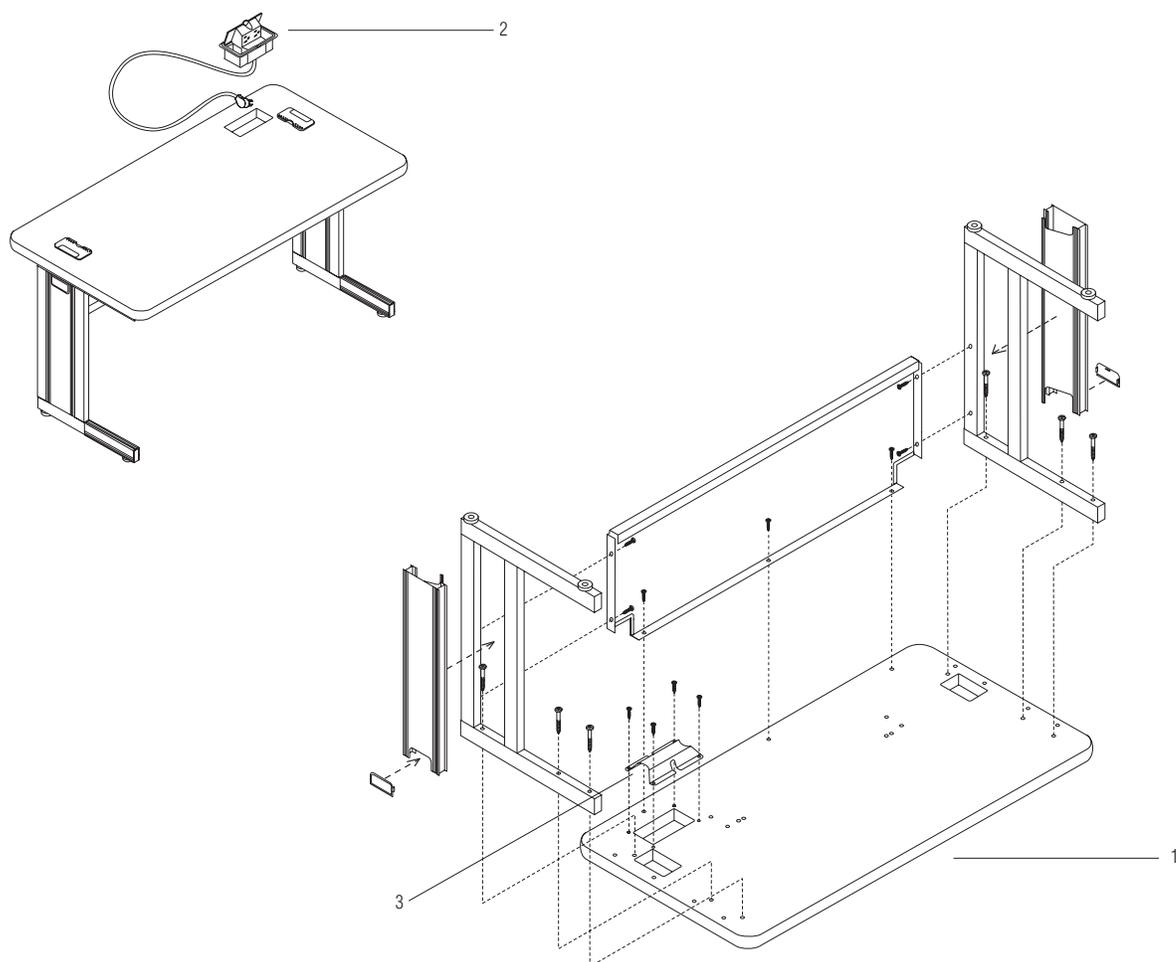

Extruded rigid PVC scuff guards cover the foot on all XXI Notes legs.

Grommets for Wire Management

3" x 2" openings with protected edges are provided for all worksurfaces. On basic adjustable keyboard worksurfaces and rectangular transitional surfaces, the grommets are located on both sides. On the end-of-run squire, corner and peninsula transitionals, the grommet is located in the top center. The triangular transitional does not have a wire management grommet.

Warranty

See "Terms" for general information.

HOW TO ORDER

Indicate the following information on order form:

1. Quantity of each item.
2. Model number, including options. See "How to Build a Model Number."
3. Any special service required.

- Note:
- The indicates that a choice is required.
 - The absence of indicates that no choice is required.
 - Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select size of worksurface.
B Select edge style.
T = Flat Vinyl T-edge
M = 3mm PVC edge
C Select keypad location.
C = Center
R = Right
L = Left
D Select height.
7 = 27"
9 = 29"
E Indicate location and type of leg.*
S = Standard (both standard legs)
R = Right (right transitional leg)
L = Left (left transitional leg)
B = Both (both transitional legs)

*Note: If ordering Basic Worksurface as a freestanding unit, or if only one side connects to a transitional worksurface, the "B" option for both transitional legs is not available.

• Must order corresponding worksurface connector to attach to adjacent table when using transitional legs.

- F** Select trim color for painted surfaces.
B = Black
G = Gray
S = Sand
W = Warm Gray
L = Light Tone
G Select laminate surface.
AA = Cream
AB = Champagne
AC = Barcelona
AD = Tidal Sand

HOW TO ORDER

Indicate the following information on order form:

- Quantity of each item.
- Model number, including options. See "How to Build a Model Number."
- Any special service required.

- Note:
- The indicates that a choice is required.
 - The absence of indicates that no choice is required.
 - Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select size of worksurface.
B Select edge style.
T = Flat Vinyl T-edge
M = 3mm PVC edge
C Select surface direction.
L = Left
R = Right
D Select height.
9 = 29"
E Indicate location and type of leg.*
S = Standard (both standard legs)
R = Right (right transitional leg)
L = Left (left transitional leg)
B = Both (both transitional legs)

*Note: If ordering Basic Worksurface as a freestanding unit, or if only one side connects to a transitional worksurface, the "B" option for both transitional legs is not available.

• Must order corresponding worksurface connector to attach to adjacent table when using transitional legs.

- F** Select trim color for painted surfaces.
B = Black
G = Gray
S = Sand
W = Warm Gray
L = Light Tone
G Select laminate surface.
AA = Cream
AB = Champagne
AC = Barcelona
AD = Tidal Sand

- AE** = Porcelain
AF = Aruba Tan
AG = Black
AH = Dark Gray
AI = Dawn Gray (Greige)
AJ = Fog
AK = Black Grandin
AL = Smoke Granite
AM = Sand Grandin
AN = Light Granite
AO = Tundra
AP = Earthen
AQ = Rose Grafix
AR = Shale Grafix
AS = Sierra Grafix
AT = Beige Grafix
AU = Sand Stone
AV = Kentucky Walnut
AW = Tennessee Oak
AX = Light Oak

HOW TO ORDER

Indicate the following information on order form:

- Quantity of each item.
- Model number, including options. See "How to Build a Model Number."
- Any special service required.

- Note:
- The indicates that a choice is required.
 - The absence of indicates that no choice is required.
 - Alpha-numeric characters in place of indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

- A** Select size of worksurface.

- B** Select edge style.

T = Flat Vinyl T-edge

M = 3mm PVC edge

- C** Select PowerUp location.

L = Left

R = Right

C = Center

B = Left and right (60" and 72" only)

- D** Select height.

2 = 42"

7 = 27"

9 = 29"

- E** Indicate location and type of leg.*

S = Standard (both standard legs)

R = Right (right transitional leg)

L = Left (left transitional leg)

B = Both (both transitional legs)

*Note: If ordering Basic Worksurface as a freestanding unit, or if only one side connects to a transitional worksurface, the "B" option for both transitional legs is not available.

- **Must order corresponding worksurface connector to attach to adjacent table when using transitional legs.**

- F** Select trim color for painted surfaces.

B = Black

G = Gray

S = Sand

W = Warm Gray

L = Light Tone

- G** Select laminate surface.

AA = Cream

AB = Champagne

AC = Barcelona

AD = Tidal Sand

AE = Porcelain

AF = Aruba Tan

AG = Black

AH = Dark Gray

AI = Dawn Gray (Greige)

AJ = Fog

AK = Black Grandin

AL = Smoke Granite

AM = Sand Grandin

AN = Light Granite

AO = Tundra

AP = Earthen

AQ = Rose Grafix

AR = Shale Grafix

AS = Sierra Grafix

Features

Single pedestal	•	•	•
Dual pedestal		•	•
Single worksurface	•		•
Dual worksurface		•	•
Sliding rear surface		•	•
Available with keyboard		•	•
Powder-coated finish	•	•	•

Dimensions

height range	26"–40"	26"–40"	26"–40"
table width	34"–58"	34"–58"	40–47"
table depth	29"	29"–41"	—
front surface depth	29"	11½"–24"	—
rear surface depth	—	16½"–18"	—

SPECIFICATIONS**Worksurface Top**

1/4" thick consisting of Novaply particle board with a .020" phenolic backing sheet.

Available with .053" high-pressure laminate and flat vinyl T-edge or 180° post-formed front edge with .042" high-pressure laminate and flat P.V.C. side and rear edge.

Dual surface tops provide a 1" clearance between surfaces for cables. Worksurfaces are undersized 1" on both sides and rear for proper clearance during operation. Grommets are standard on rear surface.

Height Adjustment

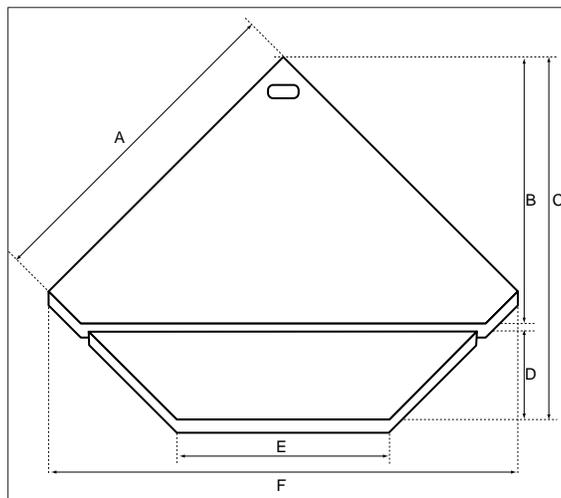

Ranges from 26" to 40". PositionMate keyboard surface 21" to 47".

Drive System

60 Hz, 110 V, AC motor. 250 lbs. lift capacity; higher weight capacities are available. No belts, pulleys or hydraulics. The motor is 1.2 amps—no load; 1.6 amps—full load for single pedestal, 2.4–3.2 for dual pedestal.

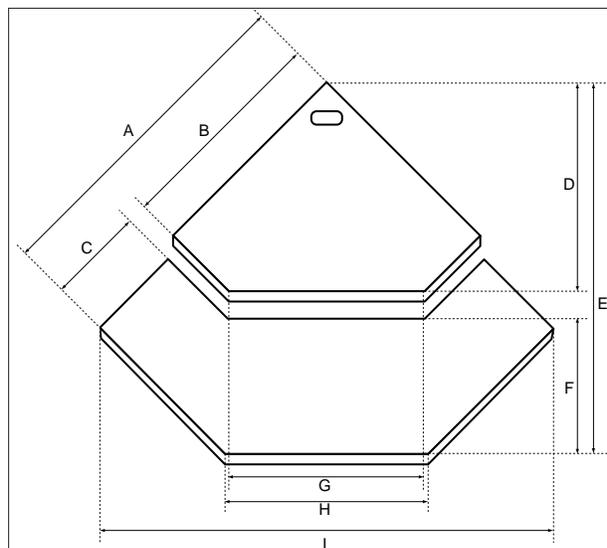

Leg Assembly

Designed with integral foot support and non-marring foot cover.

XXI Notes Budget Typicals

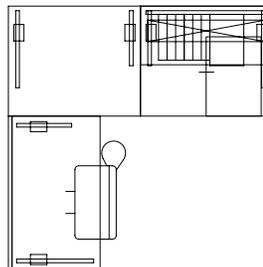

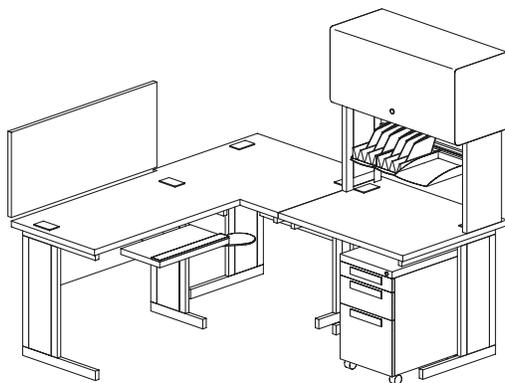

Assistant Station

Workspace 48 sq. ft.
Budget Price \$1,927

Note: Budget price is based on single typical workstation. Price will decrease when workstations are clustered.

Workstation Features:

- Laminate surfaces with flat vinyl T-edge
- Fabric overhead units with task lights
- Two mobile pedestals pencil/box/file
- Paper management tool rail and accessories
- Articulating keyboard with mouse pad
- Privacy screens

Clerk Station

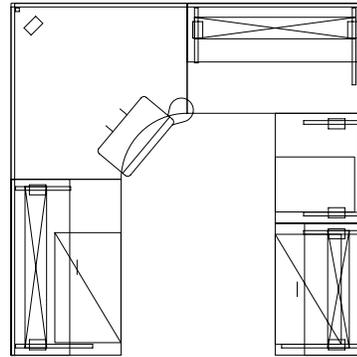

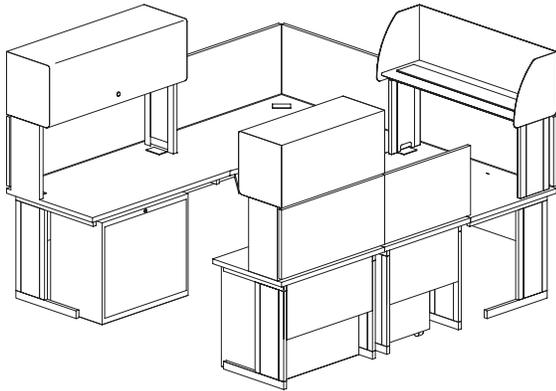

Workspace 36 sq. ft.
Budget Price \$1,458

Note: Budget price is based on single typical workstation. Price will decrease when workstations are clustered.

Workstation Features:

- Laminate surfaces with flat vinyl T-edge
- Fabric overhead unit with task light
- Mobile pedestals pencil/box/file
- Paper management tool rail and accessories
- Articulating keyboard with mouse pad
- Privacy screen

XXI Notes Budget Typical

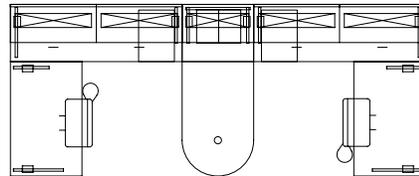

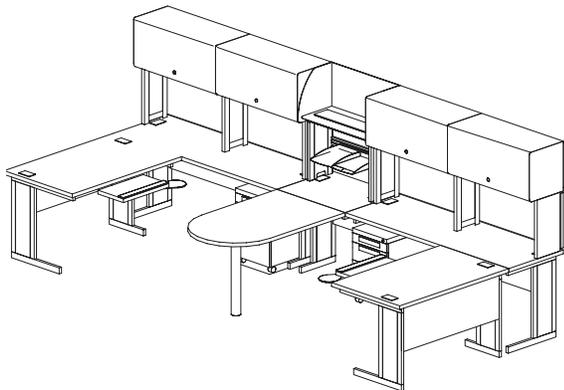

Engineer Station

Workspace 36 sq. ft.
Budget Price \$3,149

Note: Budget price is based on single typical workstation. Price will decrease when workstations are clustered.

Workstation Features:

- Laminate surfaces with flat vinyl T-edge
- Fabric overheads, open shelf with task lights
- Mobile pedestal pencil/box/file
- Two 30" wide 2-high lateral files
- Articulating keyboard with mouse pad
- Privacy screens

Shared Station

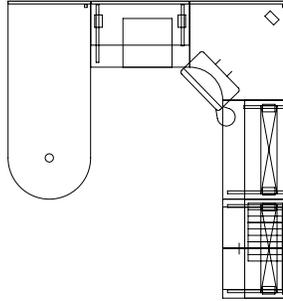

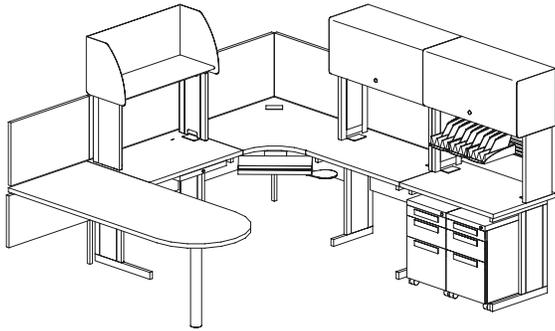

Workspace 87 sq. ft.
Budget Price \$3,430

Note: Budget price is based on single typical workstation. Price will decrease when workstations are clustered.

Workstation Features:

- Laminate surfaces with flat vinyl T-edge
- Fabric overheads, open shelf with task lights
- Two mobile pedestals pencil/box/file
- Paper management tool rail and accessories
- Articulating keyboard with mouse pad
- Privacy screens

XXI Notes Budget Typical

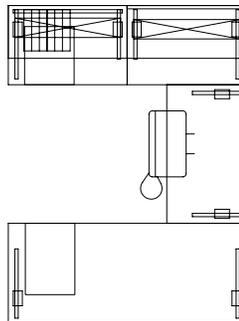

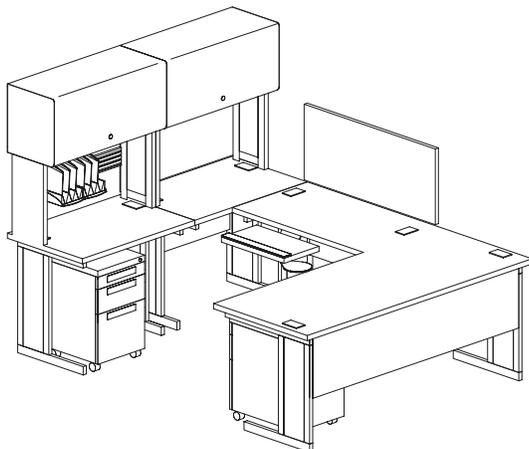

Manager Station

Workspace 64 sq. ft.
Budget Price \$2,648

Note: Budget price is based on single typical workstation. Price will decrease when workstations are clustered.

Workstation Features:

- Laminate surfaces with flat vinyl T-edge
- Fabric overheads, open shelf with task lights
- Two mobile pedestals pencil/box/file
- Paper management tool rail and accessories
- Articulating keyboard with mouse pad
- Center drawer
- Privacy screens

Receptionist Station

Workspace 92 sq. ft.
Budget Price \$2,225

Note: Budget price is based on single typical workstation. Price will decrease when workstations are clustered.

Workstation Features:

- Laminate surfaces with flat vinyl T-edge
- Fabric overheads with task lights
- Two mobile pedestals pencil/box/file
- Paper management tool rail and accessories
- Articulating keyboard with mouse pad
