Why It's A Good Idea.

Are timeliness of delivery and maintaining the highest quality control critical requirements to the success of your business? Have those hidden costs of operating overseas been worth the aggravation?

Federal Prison Industries, Inc.(FPI), through its Commercial Market Services Initiative, is now offering a low-cost, experienced, and motivated labor source to U. S. firms. We provide high quality data services, packaging, sorting, distribution, help desk, recycling, repair work and other services.

Our objective is to establish commercial market services partnerships, particularly with those companies interested in repatriating their operations. FPI will benefit from skills training and work opportunities for Federal inmates. Our partners will benefit from the attractive labor rates, cost efficiencies and added geographical access to factory locations.

To Find Out More

To find out more about the benefits FPI can bring to your business, contact:
