

FABRIC CARD

Comprehensive Upholstery Options • 2025

PERFORMANCE. QUALITY. DESIGN.

We have taken great care to accurately reproduce these upholstery options. However, there may be variations between the photographic and actual samples due to different display qualities of devices.

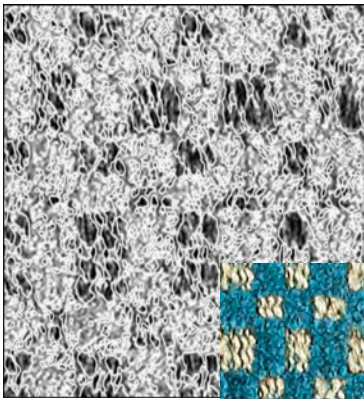

Also, finished products may vary slightly. We cannot assure an exact piece-to-piece match due to certain variations in raw materials.

Not all upholstery options are available on all product lines. Contact an OFG Sales Representative for more information.

To locate your local UNICOR/OFG Sales Representative, go online to www.unicor.gov/OFGSalesReps.aspx

LEGEND	
VALUE	DESCRIPTION
DURABILITY	Fabrics are generally tested on their ability to resist surface abrasions (ASTM C4147) and pilling resistance (ASTM D3511). OFG reports a possible durability rating from 5+ (heavy duty) to 1 (standard). This value is not indicative of the product's life-expectancy nor warranty status. OFG does not independently evaluate any upholstery testing, therefore OFG durability value is not shared with the manufacturer and should only be used for market comparability.
COLORFASTNESS	Certain dyes in this product may migrate to lighter colors. This phenomenon is increased by humidity and temperature and is irreversible. Class in the colorfastness requirements is based on a numerical scale of 5+ for no color transfer or negligible change to 1 for very severe color change or color transfer or unrated. OFG reports the variance between offering from typical manufacturer testing in dry, wet and bright environments.
CFC	Coated Fabrics Cleaning instructions are provided by the manufacturer which may include the purchase of specialty cleaners available through third-party retailers commonly referred to as 'conditioners' and/or 'protectants.' and OFG believes those instructions should be followed to extend the life of the upholstery.
BC: XX-XX	Bleach Cleanable - first part(s) bleach, second parts water (ex. BC:1-9 would be mixed as 10% bleach, 90% water solution), do not exceed 10 min before thoroughly rinsing the area the solution was applied
S	Solvent - When using a solvent or dry cleaning product, follow instructions carefully and clean only in a well-ventilated room.
WS	Water Solvent - Spot clean with a mild solvent, an upholstery shampoo, or the foam from a mild detergent which is water-based.

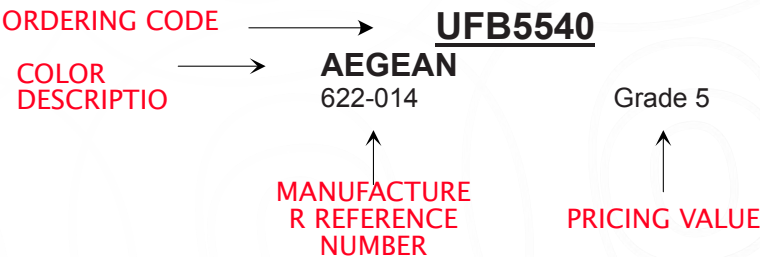

EXPLANATION OF UPHOLSTERY SWATCH
